PROFESSIONAL SUMMARY

Java Full Stack and MERN Stack Developer with 3+ years of experience designing, building, and deploying scalable enterprise web applications. Delivered 180+ secure RESTful APIs across 3 live production platforms using Java, Spring Boot, React.js, Node.js, Express.js, and MongoDB. Skilled in Microservices architecture, JWT authentication, Role-Based Access Control (RBAC), and production deployment via AWS, Nginx, and PM2. Uses AI-assisted engineering tools (GitHub Copilot, Cursor, Warp) to shorten release cycles and improve cross-team delivery speed.

TECHNICAL SKILLS

Frontend: React.js, Vite.js, Redux, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Bootstrap, React Bootstrap, Axios, Responsive Web Design

Backend: Java, Spring Boot, Node.js, Express.js, RESTful APIs, Microservices Architecture

Databases: MongoDB, MySQL

State Management: Redux, Redux Toolkit, Redux Thunk, React Context API

Deployment & DevOps: AWS S3, AWS SNS, PM2, Nginx, OVI Panel, cPanel, Vite build tooling, Server Deployment

API & Security: REST API Design, JWT, AES/RSA Encryption, Bcrypt, Base64, RBAC, OTP Verification, HTTPS/SSL, Swagger, Postman

AI Developer Tools: GitHub Copilot, Cursor, Windsurf, Warp (AI Terminal), Kiro, OpenAI Codex, Google Antigravity

Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA, Eclipse, PayU, SMTP, SMSIdea

Core Competencies: Problem Solving, Analytical Thinking, Communication, Cross-Functional Collaboration, Teamwork, Adaptability, Quick Learner

WORK EXPERIENCE

Java Full Stack Developer — Thikse Software Solutions Pvt. Ltd., Puducherry

Sep 2025 – Present

- Built the complete backend for Fuoday.com, an enterprise HRMS & ATS platform, designing and deploying 80+ REST APIs on a decoupled Microservices architecture.
- Delivered 6 core HRMS modules (Payroll, Employee Management, Attendance, Leave, Roles & Permissions, User Authentication) and 5 production-ready ATS components.
- Secured multi-tenant data across all 6 HRMS modules with JWT session management, strict RBAC, and AES/RSA encryption, protecting sensitive employee PII.
- Sustained 99%+ API uptime in production while cutting engineering cycle time by 40% through AI-accelerated workflows and SQL query optimization.

Technologies: Java, Spring Boot, Microservices, REST APIs, MySQL, JWT, AES/RSA Encryption, AWS S3, Swagger, Git, Postman, Warp AI, Google Antigravity

MERN Stack Developer — Legends Tech Solution, Puducherry

Jun 2023 – Aug 2025

- Developed end-to-end full-stack architecture for 2 high-traffic, live commercial real estate platforms using React.js, Redux Toolkit, Node.js, Express.js, and MongoDB.
- Designed and deployed 100+ REST APIs through Axios-based integration pipelines, cutting cross-team integration friction by 30%.
- Built a centralized asynchronous state management layer with Redux Toolkit and Redux Thunk to power multi-step filter search, property catalogs, and booking flows across 3 user roles (Owner, Agent, Admin).
- Integrated PayU payment gateway and multi-factor OTP validation via AWS SNS and SMSIdea, and managed production deployments across 2 live platforms using OVI Panel/cPanel, PM2, and Nginx reverse proxies.

Technologies: React.js, Redux, Redux Toolkit, Redux Thunk, Node.js, Express.js, MongoDB, Axios, OVI Panel, cPanel, PM2, Nginx, AWS SNS, SMSIdea, PayU, Bcrypt, Bootstrap

KEY PROJECTS

Fuoday.com — Enterprise HRMS & ATS Platform (Web & Mobile) — <https://fuoday.com/>

- Owned the backend architecture end-to-end; built standalone services for 6 HRMS modules (onboarding, lifecycle tracking, leave, payroll) and ATS workflows (recruitment pipeline, candidate sourcing, tracking automation), forming part of the platform's 80+ REST API surface while maintaining 99%+ uptime.
- Implemented AES/RSA database-layer encryption, JWT-based auth, and RBAC for multi-tenant roles, with full API documentation via Swagger.
- Designed the payroll and attendance modules to handle multi-level approval chains and role-specific visibility, reducing manual HR data entry across onboarding and lifecycle tracking.

Rent Pondy — Rental Property Listing Platform — <https://rentpondy.com/>

- Built a complete MERN stack system as part of a 2-3 person engineering team, supporting 500-2,000+ active property listings and users with real-time listing matrices and custom map-based search.
- Optimized frontend asset loading and bundle size, improving page load performance by 50%+ across core listing and search pages.
- Configured multi-factor authentication via AWS SNS, integrated PayU payment gateway, and provisioned AWS S3 storage infrastructure for property media.
- Structured MongoDB schemas for property listings, bookings, and role-based user profiles (Owner, Agent, Admin) to support fast filtered search across multiple listing attributes.

PPC Pondy Properties — Real Estate Platform — <https://ppcpondy.com/>

- Designed the full MERN application structure and a rental-matching engine, working within a 2-3 person team to support 500-2,000+ property listings and users.
- Built an admin dashboard managing lease processing, digital onboarding credentials, and agent status evaluations.
- Developed reusable React component patterns and Redux-driven state flows shared across the listing, search, and dashboard modules to keep the codebase consistent and maintainable.

EDUCATION

Bachelor of Computer Applications (BCA) — Thiruvalluvar University | CGPA: 7.65

June 2017 – May 2020

CERTIFICATIONS

- Full Stack Web Development (MERN Stack & Web Design) — FITA Academy, Puducherry

ADDITIONAL INFORMATION

- Languages: Tamil (Native), English (Professional Working Proficiency)
- Geographic Mobility: Open to on-site, hybrid, or remote roles. Currently based in Chennai.
